Dear Prime Minister Gillard

According to the principles signed by ENGOs, the CFMEU and industry, and then endorsed by State and Federal government, the moratorium on logging our high conservation value forests is to begin on 15th March. Yet the pace of logging has increased since the signing.

With roading into new areas and valuable timber from new logging coupes destined to be paper, I am concerned that the Statement of Principles may be broken due to a lack of government will to implement them.

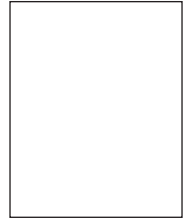

I support the end of logging our old growth forests, and expect all governments to keep their agreements and begin work to achieve the agreed outcomes by enforcing the moratorium on 15th March.
